

## WHO WE ARE

We are the anesthesia clinician for your upcoming surgery/procedure. Your clinician may be an anesthesiologist, certified nurse anesthetist, and/or anesthesiologist assistant. We work with your provider in your care.

## WHAT IS ANESTHESIA?

Anesthesia manages your comfort throughout your surgery/procedure. The type you receive (general, regional, or monitored anesthesia care) will be determined by your anesthesia clinician.

# What To Expect From Anesthesia Services

## ANESTHESIA BILLING

1

**Anesthesia services are billed separately from the surgery center. If not fully covered by insurance, you may receive a bill within 1–3 months after your procedure.**

2

**If you are insured, we will bill your insurance. Your insurance company will process your claim and determine if there is a patient portion due. If you have a balance, we bill you.**

- If your anesthesia clinician is not part of your insurance plan (out of network), but the center where you're having the procedure is in-network, then your insurance will process the service as in-network per the No Surprises Act.
- The bill will come from the clinical practice.
- We may contact you by mail, text message, and/or email.

3

**Your bill will be due within 30 days of receiving it.**

We do not balance bill patients. Balance billing is when the provider bills for the difference between the provider's charge and the allowed amount.

We have made every reasonable effort to comply with the No Surprises Act regulations. However, in rare circumstances mistakes happen and a patient may have been billed in error. If this is the case, please reach out to our customer service team and we will review and correct the patient bill.

## Before

Your anesthesia clinician will ask you to stop eating and drinking before your surgery. Be sure to follow these instructions to avoid rescheduling.

## After

You will be instructed not to consume alcohol or drive immediately after surgery. You will also be instructed to drink plenty of fluids and rest. Additionally, you will be contacted to complete a survey about your experience.

## Side Effects

Side effects may include difficulty concentrating, feeling groggy, and being nauseous. Your clinician will advise you on how to manage your pain after your surgery.

**More details will be provided before and after your surgery.**

## Contact Us

For any billing questions after surgery, please call **Coronis Health** at 517.787.6440 to speak to our customer service team.
